

Smoke Vent Certification to EN12101-2

Experience & Solutions:

As experts in ventilation, Dyer can provide simple solutions for fabricators to provide automated smoke and natural ventilation products.

Simplicity – leave it to us:

The certification is **free-of-charge to you, the fabricator.**

Our incredibly simple process allows Dyer to deal with all the calculations and paperwork, providing a stress-free solution.

Certification and Testing:

Through our German drive manufacturers D+H Mechatronic, Dyer offers a vast range of EN12101-2 certified smoke vent solutions for both façade and roof applications.

We have a vast range of profiles across many System Houses which are fully certified with our D+H drives.

These market-leading drives provide highly reliable, very quiet operation, with a host of additional technological features.
